Come join us as we practice yoga through theme-based lessons and centering activities! Each class helps to develop skills which correlate directly to the classroom. Some of the benefits that children will experience include development of fine and gross motor skills, coordination, building strength and flexibility and an increase in focus and attention.

Through the character education component, students will learn to develop self-confidence, along with respect for self and others. With the help of various breathing activities, students learn to cope with stressful situations. All of these skills are taught through theme based poses, storytelling, breathing exercises, songs, games and more in a non-competitive environment!
